

TAXPAYERS URGED TO CONSOLIDATE THEIR TAX ARREARS

RatPAYERS of Gleichen who are in arrears with their taxes, and who wish to make a satisfactory settlement, are urged by the Tax Consolidation Act to sign up under the Tax Consolidation Act.

The sign up must be made before October 1st, so those who wish to take this step have only a short time left in which to do it.

Payment under the terms of the new act is not required at once, and may be deferred until Dec 10th.

Under the terms of this new legislation taxpayers in arrears are permitted to pay off their back taxes in six annual instalments. Current taxes must be paid at the same time. The first payment is due Dec 15, 1933, and amounts to ten per cent in arrears; the second payment is 10 per cent; the third 10 per cent; the fourth and fifth 20 per cent, and the sixth 20 per cent.

Substantial discounts are allowed on balance of arrears when payment is made, the scale of discounts varying according to the number of years the taxpayer is in arrears.

The discount has the effect of wiping out the penalties which were added for non-payment of taxes.

The new legislation enables the taxpayer to keep his taxes in good standing by paying current taxes and annual payment. Unless signed up under this tax consolidation plan property in arrears of taxes will be liable to tax enforcement measures.

HOCKEY CLUB WILL PUT ON BIG DANCE NEXT MONTH

A meeting of the Hockey Club was held Monday evening in MacCallum & Sutermeister's office at which some eighteen fans and players attended.

R. W. Brown occupied the chair. Not much business was transacted about the only thing decided upon was to hold a dance on the 20th of October in an endeavor to raise some funds to finance hockey during the coming winter. Messrs. Bob Brown, Tom Johnston and J. Lester were appointed a committee to look after the arrangements for the dance.

Club members state that if every one who cares for hockey will support this dance there will be no question regarding it being a success financially. There will be other attractions besides dancing to amuse the crowd. More particulars later.

AUTUMN INFANTS SHOW MOST VIGOR

Babies born in September have the greatest chance of surviving, according to a statement issued by the health department. Ten per cent of the children born in January perish in infancy while only 7 per cent of September babies succumb.

Since 1900 the infant death rate in general has declined phenomenal, but there has been no improvement in the death rate among babies less than one week old. This is the group which finds survival most difficult and which shows the most improvement upon life-giving and life-sustaining material acquired before birth. Nearly one-half of all infant deaths occur among the less than one week group.

The particular vitamin which provides functioning vigor in an infant is designated as Vitamin E. It comes chiefly from the germ of wheat grain, from green vegetables, most vegetable oils, egg yolk, but not very abundantly from milk. This must be people consume through a vegetable diet an abundance of Vitamin E during late spring and summer months, and therefore children born in September have acquired a maximum prenatal vigor that ties them over the difficult initial period of life.

Mr. and Mrs. R. Green and Miss Perkins of Calgary spent Sunday in Gleichen at the home of Mr. and Mrs. Jan Green.

REGULAR SESSION OF TOWN COUNCIL HELD

A regular meeting of the town council was held last week.

The open basement of the old Palace Hotel was again discussed. The secretary stated he had written the cable to sign in touch with an oil company about the cable to surround the basement. The government engineer stated he could not supply holes and another assembly as they did not want to interfere with the work of machine shop or blacksmiths. The secretary stated he would follow this up and see about getting the cable at a reasonable price.

The secretary had received a letter regarding the hospital bill of A. McDonald. The amount is \$504.34 and the hospital authorities state the town is responsible for account. The town secretary had written the Department of Pensions and National Health department. Their reply was to the effect that as the deceased was never a pensioner there is no claim on their department. The secretary was instructed to write the hospital authorities and state the town was making a last effort to have the Pensions Board accept the responsibility for debt.

The subject of allowing irrigation water running to waste was discussed. A letter had been received from the department advising them to pass a bylaw to cover this. The matter was tabled until the next meeting.

It was announced the cost of grading the main street had cost \$10. The public works would attend to having the rocks removed and some dirt put on top.

The secretary advised the council that an application had been made by an individual for the consolidation of the railway. The Provincial Health Inspector's report was read. Mr. Murray stated he had written him regarding his recommendation.

Miss Jean Cook had approached Councillor MacCallum about getting the hall for the musical festival in 1934. All the councillors thought it a splendid idea to have the musical festival here next year. And on motion of W. McConnell and W. McKay Mr. MacCallum was empowered to make whatever arrangements he may think fit with the Musical Festival Board.

It was reported the sidewalk along the hall during picture show. The state for lack of repairs. This matter was left for the time being and will be attended to later on.

The secretary stated that Mr. Ramsay had spoken to him about a vegetable fair this year. The council thought this was up to the Board of Trade as it was along their line of work.

The question of business tax collections came up. It was stated several were still outstanding. The secretary was instructed to do his best and make some collections and bring in a report at the next meeting.

Some of the councillors thought there was too much noise made by people on the hall during picture show. It was decided to look into the cost of ten yards of matting. This matting would reduce the noise to a minimum.

In contrasting with the ever increasing number of automobile deaths, fatal accidents to passengers on railways have dwindled almost up to the vanishing point, due to better equipment and the greater exercise of safety precautions. Based on the experience of a transcontinental railway, a passenger could travel around the world 2,000 times without an accident and many times that far without being killed.

It is pointed out by one writer, railroad is safer than banking or any other industries calling. A passenger on a railroad train is safer than he would be sitting in his own home or attending the pictures. Nowadays the dangers of travel are confined almost exclusively to the motor cars.

THOS. WILSON HAS BIG CROP OF WEALTHY APPLES

Mr. and Mrs. Thos. Wilson have on their farm, three miles north of town, some eight or nine trees loaded with apples of the Wealthy variety which in taste and size equal any of the imported kind. These trees are some twenty years old and for the last four or five years have been bearing fruit and this year the crop is exceptionally heavy.

Driving along the main highway the orchard immediately attracts the eye and many people stop to admire the apples. Mr. Wilson states that he feels sure that if he had cultivated the land around the trees he would have more apples. This goes to prove that almost any kind of fruit can be grown in this country.

There are many people in this part of the world. One morning last the orchard was looked over by the orchard they were astounded to discover that someone had deliberately picked every apple off two of the best trees.

Here and There

An orchard consisting of only one tree which has borne 115 bushels of apples in 1932, and 1,400 bushels in March 1933. 3,974,318 ounces were produced during the first quarter of 1933, a 17 per cent decline as compared with the same period in 1932.

Canada produced 1,255,538 ounces of silver during March as compared with 1,207,154 ounces in February and 1,440,337 ounces in March 1932. 3,974,318 ounces were produced during the first quarter of 1933, a 17 per cent decline as compared with the same period in 1932.

Hon. Frank L. Polk, acting secretary of state for the United States in 1918-19, welcomed a number of companies including the Canadian Pacific Railway and the Northern Pacific Railway, is staying at the Banff Springs Hotel with his family for the summer vacation.

More than equalling expectations the New York-Montreal express of the Dominion of Ireland, not a new holiday record for special trips recently made. The passengers took the excursion chartered a romantic moon. Every night and morning the train drove the St. Lawrence, the passengers took the excursion chartered a romantic moon. Every night and morning the train drove the St. Lawrence, the passengers took the excursion chartered a romantic moon.

Fresh from a victory in which he carried an appeal for a Chinese boycott to the Privy Council, and in connection with the imprisonment, Rev. Father Joseph S. Donovan, of Maryknoll, N. Y. landed at Vancouver from Hong Kong aboard the Empress of Canada recently. He was frankly pleased at his success in the role of priest-lawyer, but his only comment was: "We try to help where we can."

Seeing the big fish he missed catching when he was unable to secure them, the Mayor of the King and Queen of Spain to Campbell, in September 1931 during their Canadian-American tour. Mrs. General E. de B. Point, of the Canadian Pacific Navigation Department, is on a trip to the waters of the fighting (one of the prize game fish of British Columbia lakes and streams).

Cultural and educational relations in the Pacific will be discussed at the fifth Biennial Conference of the Institute of Pacific Relations to be held at the Banff Springs Hotel August 14-23, though economic problems will naturally be the focus of the discussion, stated Miss Elizabeth Green, editor of the Institute's statement of an account they have contracted and failed to pay. They now never again to deal in that particular phase of business that dared "classical" them with a bill. Then

NOTHING TO GET OFFENDED AT

There are some people who try to emulate the old bossy that jumped over the moon when they receive a statement of an account they have contracted and failed to pay. They now never again to deal in that particular phase of business that dared "classical" them with a bill. Then

CANADIAN LEGION DANCE AT MILO FRIDAY, OCT. 6

The Gleichen Branch of the Canadian Legion, B.E.S.L. are putting on a dance in the Milo L.O.O.F. hall on Friday October 6th. The Legion members state that they have engaged a good penny orchestra for the occasion and a good time is assured to all who attend.

LOCAL GARDENER TELLS HOW TO COLLECT SEED

An enthusiastic gardener who has had many years' experience with flowers has sent the following words of advice to other people who wish to save the seeds of the flowers they produced this year: "We always save seeds from our garden, each season, from our favorite flowers. And if there is any special one that has lovely color and is of unusual size we save it, making about 50, so that we can save it apart from other seeds."

We have found that it is wise to let the seeds develop as fully and ripely as possible on the flower stalks. Then we snip off centre stalks and stick them into big paper bags, leaving the bags open so the seeds can continue to dry.

If you happen to have a store room in a shed or garage that is hot and dry, the seeds will dry out thoroughly and can then be put in packages. A week in such a place is usually sufficient to dry them.

To shell some seeds is often quite a task. But we have discovered a few short cuts. For example, with snapdragons we use the following method. The centre stalk from each calved flower is put in a separate paper bag and when thoroughly dry, in place of breaking open these hard seed pods, we twist the paper bag tight and crush the pods and stalks inside the bag. Then opening the bag a tiny crack, the fine small seed is sifted out into an envelope, and is ready to be labeled and put away for next years garden.

Some flowers have seed pods that are very watery, and this method of handling, with paper bags, prevents our getting these tiny pricklers into our fingers. And once the seeds are shelled, the very best method of the pod is to be tossed into the stove, already inclosed in the bag, saving a mass.

Stock seeds are best shelled as one shells peas or sweet peas, and nasturtiums are easily gathered from the vines, ready for the garden the next season. But details and details about colors are useful put on all seed packages.

Humiliation over the receiving of an account may be genuine, but it is foolish in the extreme. As one writer puts it, it is an honor to receive a bill. A bill is a statement that someone has faith in your honesty, and faith that you will some day liquidate the debt. Had he not assumed that faith in your integrity you would never have received the goods without the cash. We have heard a lot lately about the cash system being the only method for successful business. Why? Because too many people contract bills and make no effort to pay. Business with these people is a dead loss and anything but a pleasure. On the other hand when you walk into a place of business, ask for credit and receive it, make up your mind that it is an evidence of confidence and something you in return should respect. It is not the credit system that is wrong, but the abuse of it.

So, dear reader, the next time you receive a bill, don't fly off the handle. The man who gave it to you trusted to your honesty, and perhaps more than that, he trusted you to pay him what you owe him to pay somebody else who trusted him.

Charles Grant, Violinist, and C. R. Hugh, vocal soloist, are to assist in the Rally Day Service in the United Church, Sunday, Sept. 24th, at 7:30 p.m.

ECHOES OF GLEICHEN TWENTY YEARS AGO

To Anderson and Nelson is the credit of shipping the first new grain from Gleichen this year. They obtained 72½ a bushel for it and by actual measurement the wheat ran 55 lbs to the bushel. Last year at this time the same wheat was selling at 62 cents. Arthur Pelkey, the famed pugilist, arrived in Gleichen Monday evening on the train and his manager, Tommy Burns arrived by auto the following morning. The train with our local sportsmen, Bill Barr, left that afternoon on a duck hunt north or town. F. J. Unbrink on Monday disposed of six fine hogs to the Pacific Cattle Storage that averaged in weight a little over 250 pounds apiece. The price paid was \$7.75 per hundred pounds. Adolph Oldery refused an offer of \$32 per head for 500 head of cattle, including cows, heifers, cows, steers and bulls. . . M. Bolinger, who won the first prize in the Alberta Government Wheat Field competition, was held up by the Cuddy after noon when he brought in his first wheat to the elevator, by a number of interested farmers and citizens.

MacCallum was as happy as a meadow arks, no doubt in remembrance of the good hard cash that the wheat had brought him in prices. . . What Glen was totally injured when 6000 feet of lumber fell on the. The accident happened when the wagon upset on the hill leading to the Bow River ferry.

Mr. and Mrs. Peter Eibhang are happy in the birth of a daughter on August 28th. . . I've court has been, pretty quiet the past week, only one or two minor offenders being up. The new Ogilvie elevator at Cluny is nearing completion and in a very short time will be ready for business.

The carload at the Gleichen public school is steadily growing larger and in addition to the regular course two years of high school work are being taught. As the principal, Mr. McKay, . . . Prairie chicken seem to be in super abundance this year and no doubt some great bag will be made on the 1st of September. William Walsh—but no doubt a C.P.R. prize cheque for \$200 will be more satisfactory to him just at the present moment. The fine grain from this year's crop from Newtown was delivered at Cluny on Friday at A. North. It is said to be of excellent quality. . . The Alberta Provincial Legislature opened on Tuesday Mr. and Mrs. A. R. Yates returned last week from a visit of several weeks to friends in Prince Edward Island, during which time they visited Toronto, Boston, New York and several other large eastern cities. Mr. Wright, who has been visiting her cousin, J. H. Gooderham, and family for the past few months has left for her home in Owen Sound. And that's all for this week.

Havana, once a hotbed of yellow fever and other tropical diseases, is now one of the most healthful and beautiful cities in the world.

Progress In New Gold Fields

Large Amount of Work Done On Labrador Claims

Remarkable progress has been made already in the Labrador gold fields, according to Hon. W. J. Walsh, Newfoundland's Minister of Agriculture and Mines, who has returned to St. John's from the Lake Umbagog district.

He was accompanied on the expedition by Dr. O. K. Sadleir, geologist, and J. W. Froese, mining engineer. All three seemed enthusiastic about the future of Labrador.

They reported that of the 22 concessions granted by the Newfoundland government since the Labrador was opened to prospectors last fall, nearly one-half are being actively investigated by field parties. The Lake Umbagog camp, which is reached after a 200-mile aeroplane trip from Seven Islands, Quebec, had a population of 30 when they left.

Mr. Walsh and his party spent a week in the interior. They said the results were unusually scarce. Weather conditions had interfered somewhat with the work of the field parties but despite this a remarkable amount of work had been accomplished.

Right Kind Of Settlers

Those Who Really Want To Farm Are Valuable Asset

What happens if Canada refuses permission to British settlers who really want to farm? Well, one goes to Africa and produces fruit, one goes to Australia, and another is a sheep rancher; another takes up sheeping in New Zealand; still another becomes a tobacco grower in one of the far-off British colonies, and still another, with characteristic British courage, ventures into wheat growing somewhere under the Union Jack. Their product will find its way to the Old Country market just as does the Canadian surplus, and the competition is no easier for us because they raised their product in one of the other Dominions. The competition is the same and it would be far better for Canada to have them settle here, use our abundant facilities, and pay taxes. Farmer's Advocate.

Open New Motor Road

Lord Harwood Warned People Against Making Racing Track

On a recent Saturday Lord Harwood opened a grand new motor road which has been under construction for some time. It is designed to provide an alternative route from Shuffield to Doncaster. He wisely told motorists that this is not to be a road, not a racing track.

He urged "temperance" in the "speed" sense—upon those about to use it. "Be good with your new toy."

Or don't break the patience of the drivers who have removed most of the speed limit, may in desperation take to the roads for a bit of it. If we mistake roads for racing tracks.

Here, then, is the convenient and pleasant way. Its history is brief. How many accidents on it before this year ends?—London Daily Mirror.

Denmark Will Study Of Lindbergh

Result To Decide Use Of Greenland

A commission of Danish experts will examine Colonel Charles A. Lindbergh's report on his experimental flights over Greenland. Premier Haugen and his cabinet will depend the Danish government's action regarding concessions for flights across Greenland.

The aviation which Colonel Lindbergh represents applied for rights to maintain an air route via the Danish peninsula some years ago. The Premier said: "The application was rejected because we did not find a reasonable foundation for the belief in air traffic with landings upon such primitive conditions as in Greenland," he went on.

Resist Even Heaviest Traffic

Czech-Slovaks Satisfied With New Glass Surface For Roads

All sorts of experiments have been made in recent years in order to get the most out of the road surface. The substance with which to make a road of glass, and glass roads are now found in several parts of Czech-Slovakia. The glass is ground and mixed with cement. It is then spread on a rough concrete bed and is a stiff wet, and finally the surface is finished with water-glass or a solution of lime, to produce a smooth surface. Exhaustive tests have been carried out, and this glass surface has resisted even the heaviest traffic, being even improved by big six-wheeled motor lorries.

Miniature Paintings

Microscope Needed To See Fine Work Of English Artists

Painter of miniatures so small that 20 of them will fit on a postage stamp. Stanley A. Burchett, of London, formerly of the Grosvenor Gallery, claims that they are the smallest pictures in the world. Two, about an eighth of a postage stamp in size, have been purchased by the queen. One is a seascape showing a sailing vessel at dawn, and the other a still-life of margarets in a blue vase.

Dentistry Is Olden Times

Even the Ancient Egyptians Had To Go To "Open Office" For Dental Work

Dr. J. R. Lowry, McGill University specialist in his branch of dentistry, has told of dental work done by the ancients as early as 3400 B.C., in a talk before a local service club. He also described lower traces of primitive surgery among the Greeks, Egyptians and the Romans.

The World Wheat Situation

People who had the privilege of listening to Premier Bennett's speech before the members of the Montreal Board of Trade at the banquet tendered to him on his return from attending the World's Economic Conference, and the Wheat Conference of the leading wheat exporting and importing countries which followed the larger world gathering, undoubtedly learned many things about wheat matters, and especially wheat, which were entirely new to them and must have impressed them with the magnitude of the problem which now confronts Canada in disposing of its chief article of export—wheat.

Prior to the Great War, Canada was rapidly forging ahead to first place among the wheat exporting nations of the world. Gradually the United States, which had been the great exporter, was relinquishing her position as a wheat exporter and more and more rapidly approaching the stronger economic position where her production of wheat would not be more than sufficient to meet her own domestic requirements. In fact, it was confidently stated by persons in authority that in a few years the United States would be a wheat-importing rather than a wheat-exporting nation.

Canada, Australia and the Argentine found their markets in Great Britain and the principal countries of continental Europe, France, Germany, Italy, Spain, Holland, Belgium, all of which countries took large quantities of imported wheat either directly from the country of origin, or indirectly through the London and Liverpool markets. Then came the Great War. Wheat was in greater demand than ever. Europe was willing to pay almost any price to get it. To meet the demand of the Allied nations it was urged as a patriotic duty upon the people of Canada, equalizing the existing situation, to raise wheat and more wheat. Great production of food-stuffs was the slogan, and the most intensive organization was directed to bring about that larger production. The United States again turned to quota production of wheat because of the prevailing high prices and unlimited market.

The war taught the nations of Europe the lesson of the importance of being able to feed their people in times of war or other emergency. Germany learned the lesson. Italy learned it. France learned it, and while not directly involved in the war, Spain learned it through the high price she had to pay for wheat and other imported commodities. The necessary work of reconstruction of their countries and industrial towns and cities was under way, the countries of Europe still offered a good market for imported wheat and at a high price. But the governments of these countries organized to raise more wheat, meet their own requirements, and thus safeguard themselves against starvation on the one hand, or the possibility of being required to pay exorbitant high prices on the other hand in the event of a further war or world emergency. They offered bonuses to their farmers to produce wheat, they fixed unreasonable high prices on wheat, they arbitrarily governed all importations, and fixed minimum quantities of imported wheat that might be used by millers and in the making of bread.

Premier Bennett outlined the effect of these things in his speech. The four great wheat exporting nations are Canada, Argentina, Australia and the United States, the chief of which is Canada, while the great wheat importing nations are generally listed as being Great Britain, France, Germany, Italy, Spain, etc. But Premier Bennett pointed out, whereas European countries, in 1930 produced approximately 900,000,000 bushels of wheat, in 1933, just three years later, they produced 1,220,000,000 bushels, an increase of 320,000,000 bushels.

Even more illuminating was Premier Bennett's statement that this year France will produce between 75,000,000 and 100,000,000 more bushels of wheat than Canada; Italy will produce 75,000,000 bushels more than Canada; Germany and Spain combined will produce 120,000,000 bushels more than Canada. These countries were the former buyers of our Canadian wheat; now they are producing more than Canada.

Mr. F. E. Murphy, who was the United States Government delegate to the wheat conference in London, given the wheat production of these four European countries this year as 1,015,000,000 bushels, against Canada's estimated crop of 500,400,000 bushels. Argentina, 200,000,000 bushels, Australia, 174,000,000 bushels, and United States 495,000,000 bushels. In other words, these four European countries will produce almost as much wheat this year as the four chief exporting nations. In addition, the Danish countries—Hungary, Roumania, Yugoslavia and Bulgaria, and the Soviet republics, approximately 177,000,000 bushels. Russia is steadily increasing her wheat production and, while unquestionably her own people need it, the Soviet authorities nevertheless export large quantities in order to finance necessary purchases abroad.

In the face of this situation, brought about, so Premier Bennett declared, by a condition of things expressed in one little four-letter word, Fear—fear of starvation in the event of another war which contingency is still hanging over Europe, and fear of ransom, or in other words, of being again compelled to pay exorbitantly high prices for imported wheat in order to stave off starvation,—the World wheat conference entered into an agreement which provides on the one hand for a limitation of exports of wheat from the chief exporting nations and a reduction in the acreage sown by the four largest exporters of wheat, and on the other, means for so further increase production by European countries, except Russia, for a removal of some of the restrictions now imposed by European countries designed to reduce the consumption of wheat by the use of substitutes, and for an eventual reduction in the tariffs now imposed on imported wheat when the price reaches a certain stipulated figure.

Admittedly this agreement is in the nature of an experiment. Whether it will prove practical in actual operation remains to be seen, because there are many factors which enter into the calculation entirely beyond the control of man. However, the facts and figures here presented are undoubtedly of great interest to the people of Western Canada and provide much food for local thinking and planning on their part.

"I mean to know you. Did I once lend you money?" Little America, Australia had no like until European explorers came there.

"Yes." Paris plans to build many schools.

Bowel Complaints of Children During the Summer Months

Mothers should look well after their children during the hot summer months. Despite all they can do the children may be seized, at any time, with diarrhoea, dysentery, or other bowel trouble.

It is a safe remedy in Dr. Fowler's Extract of Wild Strawberry; a remedy that has received the endorsement of legions of Canadian mothers during the past few years. The facts and figures here presented are undoubtedly of great interest to the people of Western Canada and provide much food for local thinking and planning on their part.

Prototype Kilogram Valuable

Only About Thirty Standard Measures Are In Existence

A secret mission in the charge of a high official of the London Board of Trade, recently took first to Paris and then to Berne, the "British prototype kilogram."

This is Britain's official copy of the "international standard kilogram," on which all metric and scientific measures of weight are based.

At Berne, which is the home of the international committee of weights and measures, the "British prototype" was compared with the international standard.

These comparisons have been made only once before since 1889.

The international and the British kilograms were weighed against each other on a balance sensitive to a hundredth part of a milligram. There are 28,350 milligrams to an ounce.

The prototype is made of a platinum-iridium alloy.

In spite of the high resistance of this metal to external influences the British kilogram could have changed its weight by a few hundredths of a milligram or so. If minute changes occur they are reported to parliament.

Plans for the journey were kept secret lest bandits might attempt to steal the prototype. A kilogram of iridium-platinum is worth several hundred pounds sterling as a metal alone.

While a "prototype kilogram" is naturally worth far more than its price as metal, for there are only about 30 in existence, the cost for each of the principal nations.

Military Command Changes

Toronto Officer Goes To Victoria To Take Over Military District

Major-General E. C. Ashton, C.M.G., V.D., district officer commanding military district No. 2, Toronto, is leaving shortly for Victoria where he will take over military district No. 1, which includes the province of British Columbia and the Yukon Territory.

Brigadier-General T. V. Anderson, D.S.O., district officer commanding military district No. 14, with headquarters at Winnipeg, replaces Mr. Ashton at Toronto, and is understood Brigadier W. B. Beaman, D.S.O., whose appointment to command military district No. 13, came effective a short time ago, will go to Winnipeg to succeed Brigadier-General Anderson.

Long Trip For Biplanes

British Machines To Fly 11,000 Miles Over Africa

Three large British biplane-carrying biplanes are destined to make later this year the longest and most ambitious formation flight yet contemplated over the breadth of the continent—a journey of 11,000 miles from Cairo in the east to Bathurst and Dakar in the west. Their route goes such as far as Khartoum and thence westwards over French Equatorial Africa, Nigeria, the Gold and Ivory Coasts, Sierra Leone, the Gambia and Senegal. They will fly in a line of three, with a fourth biplane which were unengaged less than a generation ago.

France has ruled that motion picture films in foreign languages can be shown in only 16 theatres in the country.

A new high-speed passenger and mail plane in Germany has a speed of 216 miles an hour.

Freight Car Was Elusive

Ex-Sergeant Provoked He Did Not Abandon His Post

An ex-sergeant brought an atmosphere of comic relief into the military police court in Paris, when he heard appeals from war-time court-martial sentences when he successfully appealed against a sentence of death for 18 days' imprisonment for twice abandoning his post.

Sergeant Nigon was ordered to escort a freight car containing 5,000 gas masks. When the convoy stopped for the night he went to sleep, and when he awoke up the box-car had disappeared.

Training authorities assured him it would come back. It turned up two days later.

He was then told the train would appear tomorrow night but when he looked for it again it had disappeared. Eventually he discovered it had arrived at its destination without the loss of a single gas mask.

In reply to questions he said he did not sleep in the box-car because a soldier was only allowed to sleep in a horse car during the war. If he had slept none of the train would have been run over. He did not get inside because if he had done so they would not have been able to shut the door. He declared he did not abandon his post because a post is a fixed point and the box-car was a movable object.

It was a "phantom car," he said. "It kept disappearing."

He was acquitted and the sentence quashed.

Air Permeated With Gas

Carbon Monoxide From Cars Menace To Human Life

Subjects of the "gas" menace of increasing intensity from automobile exhausts, residents of large cities may now require the wearing of gas-masks in self-defence," says Sir W. J. D. W. Wheeler, medical biologist, who is an honorary fellow of the American College of Surgeons.

Light on the unseen effects of the motor-car upon human life was thrown by Sir William at the meeting of the British Medical Association in Dublin.

Permeation of the atmosphere with gases from autos accounts for an unestimated portion of the annual death rate, he said.

"The blood of traffic policemen has been found to be charged with carbon monoxide at a high concentration, and the blood of those constantly motor in cities must be similarly polluted."

An Interesting Swap

United States Museums Trade Specimens Of Extinct Birds

The Carnegie Museum now has a great auk and the National Museum at Washington has the "most" of a calvary anyway—and thereby like a pair of barter among scientists.

For one mounted skeleton of a great auk, the Carnegie Museum gave the National Museum a "rare" complete skeleton of a calvary.

Both the great auk and the calvary are—or were—birds, now extinct. The name of Bermuda fanager is crossword puzzle people, was a very large bird which moved about at night and buried itself in the sand by its tail.

Chance Meeting Recalls Rescue During War

Ship Inspector Meets Sailor He Saved From Torpedoed Vessel

A thrilling rescue in the days when British ships carried on a hazardous trade along routes infested with mines and German "subs" was recalled at Montreal harbor when Captain R. H. Monk, deputy port warden, boarded the steamer "Cris Alpin" in the course of an inspection.

Accused by a member of the crew who asked if he remembered him, Captain Monk found himself unable to recall who the man was. The seaman then proceeded to identify himself as the man whose life the Montreal port official had saved during the Great War when Captain Monk's ship had been torpedoed off the Irish coast. About to jump into the ocean, he had been rescued by the ship's master.

Returning he found a member of the crew, badly wounded. Picking him up, Captain Monk carried him to the lifeboat only a minute before a terrific explosion sent the ship to the bottom.

Two days on open sea they were picked up by an American destroyer and taken to an Irish port, where the wounded man was given treatment.

His Radio Wave Pains

Tucson Dairyman Is Obligated To Ground Himself To Obtain Relief

Scientists have started an investigation into the unique case of Martin Boker, dairyman in the Tucson district, who suffers intense pains from radio waves unless he grounds himself.

Doctors and Seattle specialists have declared they were baffled. Boker some years ago began to suffer intense pains. Physicians could find nothing wrong with him, but the pains much like rheumatism, persisted from time to time.

One day he put his hands on a water faucet and his aching pains, and they immediately vanished. When he took his hand off the faucet the pains returned. Boker wrapped a chain with copper wire, bored a hole through the floor of his living room, and "grounded" himself.

The case was brought to the attention of Los Angeles physicians by one of Boker's relatives living there, and Boker was persuaded to go to that city.

Hunan Lord Sponder

Official professor of the toughest lungs in the United Kingdom, W. B. Anglin, town clerk of Marlborough, Wiltshire, England, aged 45, was the champion from twelve miles in the National Toga-Cris annual judged at Lyme Regis. The three judges in a tent 100 yards from the yelling contestants.

Commodity prices in Belgium are increasing.

Russia's New Canal

Water Route 141 Miles, Long Constructed By Use Of Prison Labor.

Few undertakings of equal moment have been carried to conclusion with little publicity as has the Baltic-White Sea ship canal, which Russian authorities recently opened to traffic. This canal, or series of canals, is 141 miles long and gives Leningrad and heavily populated districts of Russia a short water route to vast and largely undeveloped timber, mineral, oil and grain areas bordering on the White Sea and Arctic Ocean. The former sea route to these districts was around the Scandinavian peninsula, and involved a 2,200-mile voyage past the coasts of Sweden, Norway and Finland. It took to take 17 days to make this journey, and the weather was usually unfavorable, but now the journey occupies six days, and can be made at any time during six months of the year.

The Russian G.P.U., or secret police, directed construction of the canal and by use of prison labor completed the task in less than two years. The waterway is 30 miles longer than the Suez Canal, and 99 miles longer than the Panama Canal.

Creation of the waterway fulfilled a dream that had been entertained for centuries. Because of the opening of this new traffic link Karalia and the Archangel district now can send their lumber, grain, ore, fish, oil and building materials quickly and cheaply to Leningrad, and railroads in return can transport manufactured and industrial products of Novgorod, Moscow and other populous centres of central Russia to the new port for transshipment. It is reported that a million tons of goods are passing through the canal in its first year of operation.

Record Transportation

Letter From Vancouver Reaches England In Seven Days

Record for transportation of mail was set by the arrival of mail from Vancouver to England was made when S.S. Empress of Australia landed in Southampton because a letter from Mayor E. D. Taylor of Vancouver to the Lord Mayor of Southampton.

Mayor Taylor received a cable from Mayor Wootley of Southampton, stating that the letter, which was carried across Canada by Capt. Frank Hawks on his cross-continent jump, had arrived safely.

This record of seven days from Vancouver to Southampton demonstrates the skill and efficiency of modern transportation, the mayor concluded, "and gives promise of speedy communication of the future between distant centres of the Empire."

A Real Business Man

A gentleman told one of his sons, a little fellow of eight, that a man had offered the room full of gold for his baby brother.

"That sum," he said, "I can buy you everything in the world you want. Shall I sell him?"

The parent was delighted when the youngster replied: "No, no, father."

"Oh, no, father,"

"Then the boy added: "Keep him till he's bigger; he'll be worth more then."

Give any man half a chance and he will regret later.

WEAK WOMEN

Take Lydia E. Pinkham's Vegetable Compound

Here you see that you were too weak to do anything... that you were too weak to have the strength to do your work! Women who are weak and run-down should take a tonic such as Lydia E. Pinkham's Vegetable Compound. Remedies that make you feel better, and restore your health, and give you the strength to do your work, and keep you healthy and strong.

Approximately 3,200 cubic feet of earth is to be used per acre, is required to support 200 pounds.

Had Thrilling Adventure

Montreal Woman Braves Hardships To Coast Of Greenland

Two summers ago with her husband on his trip up the west coast of Greenland in their 30-foot launch on work for the Danish government have given Mrs. J. O. B. Petersen, a young Montreal woman, plenty of adventure. She admitted the life was not exactly a garden of roses. It had its hardships, but the beauties and the glories, she felt, were more than recompense.

The dangerous thrill of seeing an iceberg loom up on the horizon, the ice packs, never knowing when a battle might erupt, and buffeting heavy seas and wild storms in a small craft, were merely a few of the adventures experienced by Mrs. Petersen. Many times the little boat had to dash for safety in some natural harbor or bay to avoid a breaking iceberg. Following a thundering noise which acts as a warning, explained Mrs. Petersen, a slab breaks from the ice, and the boat is hurled against the mountain top, slowly at first, then faster and faster. It glides into the sea and commences to roll around and around, sometimes up and down, and sometimes it breaks completely. Sometimes it settles again until the sun, beating down, you see the big mountains of the day and night, breaks up the huge berg once more.

Mrs. Petersen expressed great admiration for the scientific and artistic, cleverness and musical attainments. They were often unassuming and their manner of eating food was not lacking in refinement. The cultured civilization, she admitted, but they were likeable people and true friends. Originally suspicious to a startling degree, the natives, however, had not many of their strange beliefs due to the efforts of the Danish government to educate them and better their conditions.

"Yet I was in one northern village," she said, "where to burn seal oil while the hunters were out constituted the greatest crime. It was a terrible crime, as the natives, believing the devil, or bad spirit, is in him. They also like to sit over a dying person in his last moments, say, the spirit depart from the body."

Masons Discover Secret Room

Shells At Least 200 Years Old Found In Old Building

An old packing case full of human bones and two skulls in the find of a Parisian mason. The mason, who has bought an old mason house near Los Angeles, France, which once was the property of the Baron Turenne.

Masons were working on the old building when they chanced upon a secret room by following a concealed staircase. The mayor and county councillors were called and an inquiry started.

The president of the prehistoric commission, M. Coulli, was asked for an opinion on the find. He said the skulls were at least 200 years old.

One seems to be that of an old man of African origin.

Heads Angler's Club

Internationally-Known Author Is Invited To Give Lecture

Courtesy Riley Cooper, internationally-known author, was elected president at the first meeting of the newly organized Maine Angler's Club. The Maine River is said to be one of the finest speckled trout streams in Canada.

Water Front, Montreal, was elected honorary president, while other officers included: Vice-President, Col. S. Maynard Rogers, Jasper Park, and Secretary F. Withers, also of Jasper Park.

Oldest Highland Chief

Col. Sir Fitzroy D. Maclean, Scotland's oldest Highland chief, celebrated his ninety-ninth birthday recently on his Isle of Mull stronghold, Duart Castle. This home of his ancestors was built in 1250 and lay in ruins for many centuries until Sir Fitzroy was a boy, to restore it. Sir Fitzroy was so severely injured in the Crimean war that he was given only a few months to live.

Make Home Into Hotel

Ruskin's old home in Brantwood, England, which was his last refuge, has been transformed into a hotel for students and a conference centre for the permanent settlement of Russian exiles.

Approximately 3,200 cubic feet of earth is to be used per acre, is required to support 200 pounds.

Declares Hitler Is Of Jewish Descent

Viennese Paper Has Sworn Document To Support Claim

Footright declaration that Adolf Hitler, German chancellor and Nazi chieftain, had a good stream of Jewish blood in his veins started Europe some weeks ago. The statement appeared in the Oesterreicher Abendblatt, well known Viennese newspaper, and was substantiated by affidavits and sworn documents from many sources.

No definite counter-proof of unadmitted Nordicism was produced. Germany itself, that the well-known Vossches Zeitung, of Berlin, now under Nazi control, issued a short statement, reaffirming that the German college of sciences had previously stated itself that in Hitler's ancestry was no strain of Semite blood.

The Viennese paper affirmed that Hitler's maternal grandmother, Johanna Hitler, was the daughter of one Jakob Hitler, who with three other Hittlers left the Bohemia of Poland, a century ago, and was baptized after having settled in Vienna. Herr Hitler's father was civil engineer, and his mother, a woman named Herr Hitler was born to have changed his name from Schickelgruber to Hitler in 1877. The change is said to have been made in expectation of a legacy at the request of Kaiser Hitler, Herr Adolf Hitler's great-uncle, who was born before Jakob left the ghetto.

The newspaper published photographs of the ancestral home in the Fohna Ghetto, of a page from the Jewish register from that place, and a photograph of the tomb of the Hittlers in the cemetery. It seems that the discovery of the alleged kinship was made by Herr Alexander Baumbach, the Jewish registrar of Vienna.

"The discovery of the alleged kinship was made by Herr Alexander Baumbach, the Jewish registrar of Vienna."

Land Moves With Tide

Seismograph in Westminster, England, Shows Details Rise And Fall

England is gradually sinking into the sea, according to a recent publication of the National Blue Paper. But keep your seats, please—the rate of the subsidence is estimated at nine inches per hundred years.

According to the report, Felixstowe, on the east coast—is suffering from "that sinking feeling." It has sunk nearly 2 inches in the past fifteen years.

The Bank of England, in the heart of the metropolis, is over six inches lower than in 1850. St. Paul's Cathedral, on the other hand, has dropped only three inches in the same period.

"That there is a definite movement of the land in relation to the movements of the tide has now been confirmed. A stannograph in the County Hall, Westminster, displayed a movement of the building corresponding with high and low tides."

According to Waterloo Bridge revealed that the weight of the water caused the structure to sink at high tide and rise again at low tide.

Other high and other tunnels which run beneath the Thames have been found to change their shape at high tide. The circular tunnels are slightly oval, but return to their normal shape as the tide recedes.—London Daily Mail.

For Better Lives

Some Things That Everyone Should Hold On To

Hold on to your job when you are about to do an unkind act.

Hold on to your tongue when you are ready to speak harshly.

Hold on to your anger when you have a right to be angry.

Hold on to your virtue—it is above all prices to you in all times and places.

Hold on to your foot when you are on the point of forsaking the path of right.

Hold on to the truth, for it will stand for you, and do you good throughout eternity.

Hold on to your temper when you are excited or angry, or others are angry.

Hold on to your good character for it is and ever will be your best wealth.

Makes A Difference

A Journalist from India said he was surprised to find that high caste Hindus in United States were performing menial work, a thing which he never saw in India. That's not so strange. We knew one man who would jump out of breaking his back moving the stove for a while next day, and he wouldn't even get the kindling at home.

RT. HON. G. W. FORBES

Premier of New Zealand, now in Canada, who is hopeful of finding a better market for New Zealand butter as a result of his visit to Ottawa.

Many Masculine Competitors

Men Wins First Prize For Picked Quilt At Toronto Show

Men have found the prize awards offered for handicrafts and needlework highly attractive this year at the Canadian National Exhibition judging by the number of masculine competitors among the displays in the Women's Building.

Soldiers' hospitals and patients working in homes and hospitals under the direction of the Occupational Therapy Association for many years have been exhibitors in the craftwork classes listed in the prize list. This group has been greatly enlarged during the past four years and this year even the class reserved for women of over 75 years of age was invaded by two men over 80 years of age, who each made a quilt.

Beautiful Indian Capital

Everything In Jalpur Is Built On Fairplay Basis

The Maharajah of Jalpur, who has been in the limelight more than once of late, returns to it again by winning the Prince of Wales' Cup at Hurlingham with his polo team. His native Jalpur sounds like an odd beautiful dream for everything there seems to be built on a 'fairplay' basis. The houses in the capital are painted in every conceivable shade of blue and purple.

Fact Not Generally Known

No Harm Results From Occasional Loss Of Sleep

For those to whom the poppy-crowned god Morpheus is a reluctant visitor, Dr. George L. Walton, of the Massachusetts General Hospital, in his book, "Why Worry?" when he wrote: "It is astonishing how much sleep can be lost without harm to the body. The loss is forgotten."

Making Six-Year Tour

English Chef Collecting Recipes From Every Country In World

A Salford chef, Harold Hooper, is engaged on a six-year tour of the world, for he is journeying 35,000 miles in search of little-known recipes in order that he may add variety to British culinary tastes.

Already he has visited Denmark, Germany, Ireland, Scotland, Norway and Sweden, and already his pockets are bulging with recipes which he has obtained in foreign lands.

After a short sojourn in Salford he is off to France, Italy, Spain, Turkey, South Africa, Australia, America and Canada, where he hopes to secure thousands of appetizing recipes.

Ancient Chinese Literal

Shaped Their Money To Resemble The Object Desired

The ancient Chinese was a literal fellow. When he wanted a spouse, for instance, he would mint a coin to resemble the object desired. Evidence of his ideas on tokens of exchange is displayed at the American Numismatic Association's show in Chicago.

Hold on to your good character for it is and ever will be your best wealth.

Cambridge Scientists Return From Expedition

Bring New Species Of Animals and Reptiles From Jungle

Many animals, reptiles and insects hitherto unknown to man were discovered by three young Cambridge scientists who landed at Plymouth from an expedition into the unexplored jungle of the British Cameroons.

The collection includes: Flying squirrels called by "parachutes" of varied colors by which they fly from tree to tree.

A giant water shrew belonging to a species thought to have vanished ages ago.

Retirement Well Earned

Two Sisters Served As "Missionaries For 35 Years

Coral stone churches on scattered South Sea Isles, a school for Micronesian boys and girls, the Bible and other Christian literature and school textbooks translated into Kusanian—these are some of the results of the work of two American sisters who started out from Newark, N.J., 35 years ago and now have just retired.

The sisters are the Misses Elizabeth and Jane Baldwin, and their retirement was voted by the American Board of Commissioners for Foreign Missions.

For 29 years the sisters were the only white persons on the small island, Kusan, on which they lived. They nursed the islanders through sickness; remained with them through hundreds of furious tropical storms, and helped them through succeeding famines.

Accurate Summing Up

Moist appeal law was thus summed up in a court of appeal in connection with a court case arising out of a motor car accident: "This court has said three times, and I want it to be generally known, that if you are going at such a speed that you cannot pull up within the limits of your vision, and an accident happens, you are in the wrong."

Old Fashioned "Cream Cooking" at the cost of milk!

That's what you get when you use condensed milk in your cooking. It's economical and convenient but it is double rich in cream and gives a delicious cream-like flavor to every dish you use it for.

Little Helps For This Week

"O the depth of the riches both of the wisdom and knowledge of God! how unsearchable are His judgments, and His ways past finding out!"—Romans 11:33.

No star is ever lost we once have seen.

We always may be what we might have been.

Since God, though only thought, has life and death.

God's life can always be redeemed from death.

And evil in its nature in decay.

And any hour can blot it all away.

The hopes that last in some far distance cease.

May be the truer life, and this the dream.

Train Accidents

Seven Passengers Killed On Canadian Roads Last Year

Last year there were seven passengers killed and 310 injured in train accidents, the Dominion Bureau of Statistics says in a report issued recently. This was an average of one killed for every 3,000,000 carried and one injured for every 87,000.

Injuries to passengers ranged from scratches and bruises to more serious ones. Two passengers were killed in collisions, two fell from trains, two were killed getting on or off trains, and one from other causes.

STING BEANS BROTONNE

Two tablespoons butter; 1 medium onion; 1 tablespoon flour; 1 cup evaporated milk; 1/2 cup water; 2 cups cooked string beans, cut in one-inch lengths; salt; pepper; paprika.

Melt butter. Fry thinly-sliced onion until yellow, but not browned. Stir in flour. Add gradually evaporated milk and water. Stir until thickened. Add cooked string beans, cut in one-inch lengths and seasoning. (Serves six.)

The Call,
Gleichen,
Alberta

Town & District

Miss Lillian Eason spent the week end in Calgary visiting friends.

Miss Marguerite McBean, daughter of Mr. and Mrs. David McBean is attending C. I. I. in Calgary.

Mrs. Geo. Allistot recently fell down the cellar of her home badly spraining her wrist and shoulder.

St. Andrews W.A. Thanksgiving in Legion Hall, Saturday afternoon, October 28.

Mrs. W. E. Anglin has returned to Gleichen after spending a delightful vacation in California.

Miss K McBean of Bassano, spent a short time last week visiting her parents Mr. and Mrs. David McBean at their farm north of town.

K. Roy McLean, night specialist, of McLean & Anderson, 224 8th Ave., West, Calgary, will be in Gleichen at Dr. Forquah's office, Monday morning, September 25th, up to 2 p.m.

Saturday afternoon four covered wagons were seen on the main highway slowly winding their way northward. Behind them rode several youthful riders driving a score or more of horses and cattle.

Gardeners in town are being robbed of their summer's effort. Some or later somebody is going to get pinched and judging by the statement of those robbed Judge McConnell will have a job on his hands.

George Allistot received word last week of the sudden death of his brother, Tom, at Portland, Ore., on September 5th. Tom will be remembered by many people in the Gleichen and Arrowwood districts, having lived here for a number of years previous to 1918 when he left for the States.

From all indications there is going to be a great shortage of potatoes in Alberta and prices will likely be high. According to a news despatch the crop of Saskatchewan grown potatoes is going to be a very poor one, especially in the southern half of the province, the tubers having no chance to form to any large extent, on account of the extremely dry summer. Potatoes in northern sections will be a little more plentiful and of better quality.

Hunting on Friday afternoon, the opening day, was not the howling success it was in former years, that is as far as shooting of ducks was concerned. At Stokast Lake there were ducks by the thousands but owing to so many of the birds dying recently the lake was almost devoid of ducks except two or three hunters. Owing to the water being high and a number of guns are required to keep the ducks flying, the lake season soon sorted and the fields resorted to for Hungarian partridges. It being a cold day very few of these birds were to be seen.

Recently a citizen of Gleichen was wheeling home a load of old oyster cans, bottles etc., and curious to know what use he could put them to he made inquiry. "Going to throw them over in my back yard," he replied. "We are going to have some relations from a city visit us. We may not have much to eat, but if they see these cans, bottles and boxes laying around they will think we've had oysters, champagne, figs and nuts till we have got tired of 'em, and we are now living on bread and pork and beans for a healthy change."

Jack Lester accompanied by his chauffeur, M. Murray, spent a day last week chasing up dog owners. When they finally overhauled and individual who owned a "dave" they gently but firmly stated that they were on a dog tax collecting expedition and that for the right of a dog to gallopate around the streets the owner must disburse \$2 otherwise—here Jack made a significant motion towards his hip. These two gentlemen stepped on everybody without fear or favor and as there are about 35 canines in town, the town will be about \$70 richer by the collection expedition.

Every year reports reach us of some accident due to carelessness of a hunter, and often these accidents result in death, either to the gun carrier, or his companions. If you are among the shooting nimrods, be sure at all times to take every precaution against accidental shooting. When going through fences or walking with your partner, be sure your gun is pointed so as to cause no harm to anyone in case of accidental discharge. At the same time be a sportsman. Put up the farmers gates and if in doubt ask permission to shoot on his land. He will usually meet half way. *Givep. M. Simpson.*
